# NDIS Support Coordination Services

[starhealth.org.au](http://starhealth.org.au)

# Star Health is now offering NDIS Support Coordination Services to participants living with psychosocial disabilities who have an active NDIS plan.

Under coordination of supports, we're now accepting referrals for participants aged 16 - 64 years old with support coordination hours in their plan.

Our work is guided by a recovery-based approach, working collaboratively with carers, family members and the participant themselves to achieve the best possible outcomes.

## The NDIS Support Coordination Services we can provide are:

- ▶ Ongoing face-to-face appointments to ensure a strong understanding of your needs and to provide ongoing support and management of your mental health.
- ▶ Referrals and linkages to appropriate services that will help support you to achieve your goals.
- ▶ Support with non-NDIS linkages and supports such as community-based groups and services.
- ▶ Continued advocacy for participants with external providers.
- ▶ Management of NDIS plans and advocacy during review time.

**Should you have any questions, please do not hesitate to contact our intake team on 9684 4281 or via email at [triageclinician@starhealth.org.au](mailto:triageclinician@starhealth.org.au)**
